

ABULUDE MICHAEL

Backend Developer (Python / Go / Django / FastAPI)

Remote • clevermike02@gmail.com • 08088260578 • linkedin.com/in/clevermike02 • github.com/mikky00B • x.com/Clever00__

PROFESSIONAL SUMMARY

Backend developer with hands-on experience building REST APIs, real-time systems, monitoring platforms, and backend infrastructure using Python(FastAPI, Django) and Golang.

TECHNICAL SKILLS

Languages: Go, Python, JavaScript

Databases: PostgreSQL, SQLite

DevOps & Cloud: Docker, GCP, Microsoft Azure

Tools & CI/CD: Git, GitHub, GitHub Actions, Jenkins

PROJECTS

Watchdog - Uptime, API & Cron Monitoring Platform Live: watchdog.clevermike.studio

- Built a multi-tenant monitoring platform covering website uptime, API health checks, heartbeat (cron) monitoring, and incident tracking from a single dashboard.
- Designed alert channels and branded status pages so agencies can surface service health directly to their clients without exposing internal tooling.
- Implemented monthly reliability reports to give teams a historical view of uptime trends across services they manage.

Gatekeeper - Self-Hosted API Gateway in Go GitHub: github.com/mikky00B/Gatekeeper

- Built a config-driven reverse proxy API gateway with route-based upstream selection, multiple upstreams per route, and round-robin load balancing.
- Implemented optional upstream health checks, API key authentication, HS256 JWT verification, and in-memory or Redis-backed rate limiting.
- Added request logging, route-level analytics, hot config reload, TLS support, an admin API, a static dashboard, and CLI helpers for managing gateway workflows.

Swindle - Private Chess Journal & Activity Cards Live: swindle.clevermike.studio

- Built a private chess journal that detects story-worthy moments across Chess.com and Lichess profiles, renders shareable chess activity cards, and lets users publish selected cards to a simple social feed.
- Implemented FastAPI backend workflows for game imports, PGN parsing, analysis caching, publishing controls, public profiles, posts, kudos, comments, and feed APIs.
- Designed a React/Vite frontend for reviewing imported games, publishing chess activity, and rendering 1080x1080 recap cards for sharing.

EXPERIENCE

Freelance Backend / Full-Stack Developer

2023 - Present

Turing, Upwork & Independent Projects

- Built and delivered backend-driven web applications for clients across e-commerce and business platforms, taking projects from requirements to production.
- Designed REST APIs in Django and FastAPI, including authentication flows and database schema design with PostgreSQL.
- Handled fullstack work on select projects by building React frontends consuming backend APIs while keeping backend architecture as the primary focus.
- Worked directly with remote clients to scope features, iterate on feedback, and maintain codebases after handoff.

EDUCATION

B.Eng. Telecommunication Engineering

Federal University of Technology, Minna
